# Vocational Competence Certificate

# What is the VCC?

The VCC is a unified system of certification for vocational competences acquired outside the formal education system.

The VCC provides an opportunity to acquire new professional competences as well as to develop already acquired competences in order to adjust or adapt them to the constantly changing labour market.

# The VCC Concept

- The VCC was created in order to match knowledge and skills to the needs of businesses in the international labour market.

# Compliance with guidelines

- European Qualifications Framework and Polish Qualifications Framework
- Europe 2020 Strategy
- ESF – The Human Capital Operational Programme
- The Vocational Educational Programme (MNE)
- Lifelong Learning Program

- New Competences – for acquiring a new profession.
- Select Competences – to supplement, increase or update an existing competence.

# VCC New Competence

Allows participants to acquire new vocational skills, and gain a certificate confirming the newly acquired skills.

To gain a VCC New Competence, participants must pass exams in:

- Theoretical professional competence
- Practical professional competence
- Personal and social competence
- Language competence
- IT competence

# VCC Select Competence

Allows participants to supplement, increase or update existing competences with a range of new competences.

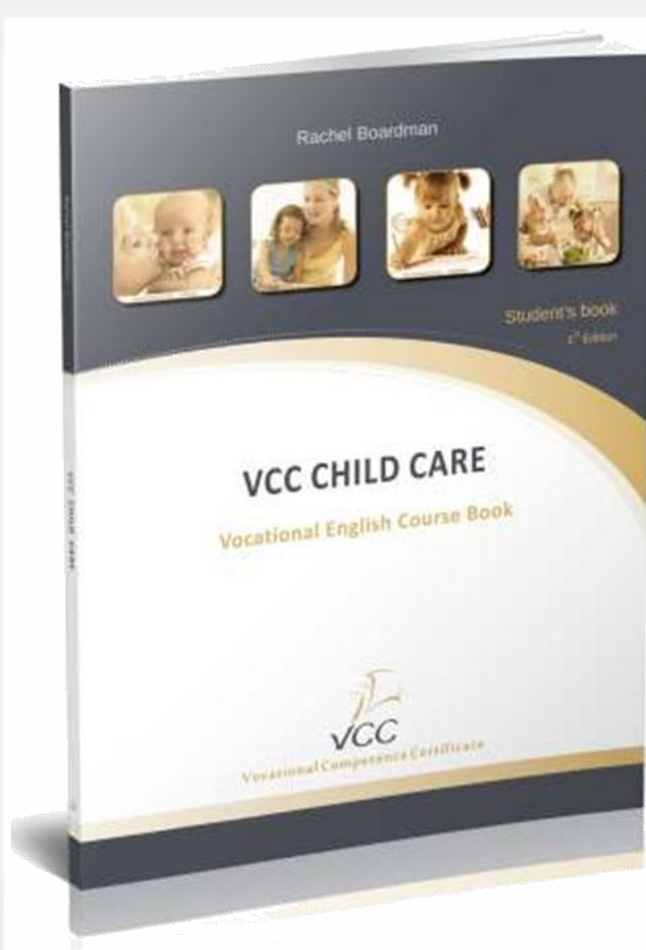

Participants can choose a VCC Select Competence for any competence appropriate for their current professional needs.

There are a wide range of Select Competences available, which all consist of 40-60 hours of training tailored to the needs of people wishing to develop their skills.

The current list of training courses is available at [www.vcci.eu](http://www.vcci.eu)
